

"INTRAVOL has dramatically changed the way I train and build muscle. In 2009, the world will witness a totally new Jay Cutler. I will never train without INTRAVOL again."

— Jay Cutler
2-time Mr. Olympia

**GROUNDBREAKING UNIVERSITY STUDY
GIVES RISE TO NEW INTRAVOL:**

Test Subjects

**GAIN OVER 9 LBS.
OF PURE MUSCLE
and Jack Up Strength by 39% Fast!**

Drinking new **INTRAVOL** during your workout will completely change the way you build muscle — forever.

Of all the things you've ever done to increase muscle growth, new gold-standard clinical research has revealed that *nothing* may be more important than what you take *during* your workout. This extraordinary scientific discovery has resulted in the development of quite possibly the most potent musclebuilder ever conceived by Team MuscleTech™. And that's saying a lot. The Team MuscleTech researchers have already created the most potent supplement line in bodybuilding history and now they have outdone themselves. Introducing INTRAVOL™ — the World's Most Advanced Intra-Workout Muscle Growth Amplifier.

In what can easily be called one of the most stunning clinical studies on musclebuilding ever documented, exercise physiologists at a leading Australian university conducted a revolutionary experiment to measure the effects of intra-workout supplementation. Test subjects

consumed key components of the INTRAVOL formula during their workout and were evaluated for hormonal and muscular adaptations as well as biochemical response. After 12 weeks, the results were simply mind-blowing. Test subjects using the key complex in INTRAVOL during training packed on 127 percent more muscle than the placebo group (9.04 vs. 3.97 lbs.). Muscle expansion in all three types of muscle fiber (Type I, Type IIa and Type IIb) was also significantly increased. Maximum strength was also jacked up by 39 percent! That's right, subjects using the key complex in INTRAVOL during training increased their max leg press by 39 percent more than subjects using a placebo (463 vs. 334 lbs.). Just imagine how much muscle you could achieve by adding INTRAVOL to an intense bodybuilding training program! INTRAVOL has revolutionized the science of musclebuilding and will help a new generation of bodybuilders rewrite history.

THE **INTRAVOL** EFFECT

When you drink INTRAVOL during your workout, you can experience the following:

- Increased Myocellular Hypertrophy
- Maximum Muscle Volumization
- Increased Anabolic Hormone Response
- Powerful Performance Enhancement
- Rapid Strength Amplification
- Maximum Cell Hyper-Hydration
- Intense Muscular Pumps & Fullness
- Enhanced Workout Recovery

HOW **INTRAVOL** BUILDS MUSCLE TO EXTREME LEVELS

Every serving of INTRAVOL is powered by five cutting-edge proprietary matrices and an advanced delivery technology to drive muscle growth and strength to unprecedented levels.

- 1 **IntraFuel**, with high-molecular weight glycogen replenishing polymers, features hyperbranched waxy maize and is designed to promote rapid cellular super hydration and increased anabolic insulin levels.
- 2 **Aminotol** is a state-of-the-art essential amino acid matrix scientifically shown to dramatically increase muscle growth and expand the size of all three types of muscle fibers when combined with other key components found in the INTRAVOL formula.
- 3 **Phosphocell** features multiple forms of advanced ultra-pure creatine and is a muscle ATP regeneration complex. Phosphocell is engineered to jack up strength to maximum levels and quickly regenerates the crucial energy source used during weight training.
- 4 **ElectroVol** helps maintain peak performance by restoring vital electrolytes lost during hardcore sessions in the gym.
- 5 **SyntheGain** is a cutting-edge branched chain amino acid (BCAA) matrix designed to promote anabolism while combating the devastating catabolic effects of training.

INTRAVOL is also powered by **OsmoSig**, an osmotic muscle nutrient transport technology designed to support rapid nutrient delivery and uptake.

Due to the potency and highly confidential nature of this formula, more details will be revealed next month!
